Reasons for allowance

Applicant's amendments (cancellation of claims) and responses on October 16, 2008 are deemed persuasive to overcome the previous 35 U.S.C. §103 (a) rejections. The references of record do not teach or suggest a method comprising : applying three-step wet processing in sequence as set forth in claim 1; the supplying of the alkaline solution in the first step and the third step comprises injection and collision of droplets formed in an external-mix bi-fluid nozzle by mixing said alkaline solution with gas from said bi-fluid nozzle to the surface of the rotated substrate; the acid solution supplied in said second step is an acid solution having an etching effect, said acid solution is a mixed solution containing hydrochloric acid, and hydrofluoric acid, and deionized water. A person of ordinary skill in the art would not have been motivated to use said three-step wet processing because the prior art does not recognize the effects of each process step (such as In the first step, particles are removed form the surface as a result of the physical impact of the droplets. In the second step, the surface of the substrate may be slightly etches, which can be removed in the third step in an efficient manner. As such, the amount of etching and damage of the surface may be reduced or minimized during the three-step wet processing).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
